

Biology/Chemistry/Physics

We would like you to choose one of the items below:

- a science experiment of some sort that you perform
- an explanation of a science concept or topic, either from GCSE or something you are interested in
- an explanation of the science behind a story that has been in the news.

Next, choose one of the methods below to showcase your chosen topic and bring your results to college when you start!

- a video filmed on your phone in the style of a YouTube clip
- a series of short video clips (like TikTok) that link together in some way
- an animation, either stop-motion using objects and your phone, or using software
- a poster
- a model made from cardboard, plasticene or other materials.
