

USING ENGLISH IN...

ANIMAL CARE

WHAT YOU'LL NEED TO KNOW...

- To clearly communicate with new and existing pet owners about the care needs of their animals.
- To make accurate and clear records of results from animal behaviour studies and health checks so that animal health care plans can be up-to-date.
- Interpret results to better describe the behaviours and features of different animals.

Without these skills you could be limiting your opportunity to progress in your career.

Workers who care for animals in kennels, stables, zoos who provide specialised training, grooming etc. can earn around **£16,841**.

Veterinary nurses who provide assistance to veterinarians can earn an average of **£20,500**.

*these figures are a national guide only

So don't miss out on your GCSE and functional skills English classes identified on your timetable.

USING MATHS IN...

ANIMAL CARE

WHAT YOU'LL NEED TO KNOW...

- You need to apply ratio accurately when mixing up disinfectants and medications.
- To work out the area and volume of animal enclosures to know how many animals you can stock.
- So you can weigh and measure animals regularly to monitor their condition and to work out accurate food rations and medication dosages.

Without these skills you could be limiting your opportunity to progress in your career.

Workers who care for animals in kennels, stables, zoos who provide specialised training, grooming etc. can earn around **£16,841**.

Veterinary nurses who provide assistance to veterinarians can earn an average of **£20,500**.
