

Dear new student

I have been a returning student at West Notts College for three years. On my first year of coming to the college, I was feeling very nervous about walking into a new place and meeting people that are different to me.

My first course that I attended was the Practical Work Skills course. This course easily allowed me to settle into the college and get to know all my new friends. I had a wonderful tutor who always helped me if I was struggling to do something, and they always made it easier for us to get involved.

I am now currently working on my IT Level 1 course. This course will further improve my IT and communication skills to help me when I am looking for a job soon. This year was a struggle at first, but once I got to know how to do everything, I was able to complete work to a higher standard.

All the best!
