

Why I enrolled on the course

When I was 16 I realised that business was one of the most valuable subjects you can study. Not only is there a clear path to university, but a wide range of jobs and apprenticeships available afterwards. I enrolled on the course because I wanted to further my education and really focus on my love for business. I didn't like the idea of trying to juggle three or four A-Level subjects because there were no other subjects I felt this passionate about. Universities and employers both really like taking on BTEC students, so it was a no brainer really.

What I gained

We covered a wide range of topics on the course and I feel it has prepared me well for the future. Deciding to enrol on the course was simply the best and most important decision of my life. The extra-curricular activities that were available helped me build on my employability and really helped me strengthen my university application.

New skills and benefits

My assessments at college were mainly done through an essay or a project of some sort. This massively helped my team-working and communications skills, which I feel are very transferable into my chosen career path. I'm really glad I chose to study at West Notts College because there are tons of activities you can do outside of the classroom and the tutors really care about you. They constantly went above and beyond for me and my friends and I wouldn't be where I am today without them.
